

HI-MAX

Commercial Duty

A great value all-round performer to compliment any transport operation

BRIAN JAMES TRAILERS

» Connected to you

Hi-max vehicle transporter and recovery trailers are an ultimate expression of outstanding value for money.

Robust, reliable performance combined with commercial durability ensures the Hi-max becomes a real asset to any operation.

Every operational feature of Hi-max trailers has been carefully considered. Setup for loading is simply pull up, tilt and load. Hi-max, the automotive professional's trailer.

Hi-max

Transport industry professionals will recognise the Hi-max as capable and competent equipment. It looks right, it is right for the job.

Hi-max is sufficiently robust to handle heavy vehicles such as a Range Rover and yet possesses the technical ability to load low sports cars. The elegant solutions employed in Hi-max underline the benefit of simplicity.

The centre piece of the design is within the main chassis sections. An intricate, stressed fabrication of high strength steels and pressings form a tough backbone. It incorporates all important design details that protect cars, operators and other road users.

Brian James Trailers have created this trailer to appeal to professionals as a working tool. It is through many years in industry and commerce plus our absolute customer commitment that we understand the importance of details so often overlooked.

- Commercial Quality
- Low Loading
- Easy Loading

50mm ball coupling is featured on all Hi-Max trailers and includes a quality integral lock

Robust Jockey Wheel mounted in centre of A-Frame for maximum stability.

Multiple Tie-Down points along the length of the chassis is a hallmark of every Brian James Trailer

Grip pads are positioned to assist in preventing vehicles from moving during travel. Pads are also fixed to each loading ramp

Winch options (manual and electric) ensure that disabled vehicles can be loaded with ease. Manual winches have an optional adjustable winch mount (shown). This equipment is standard with electric winch options

Spare wheel mounted on a convenient chassis bracket

Fully integrated chassis and mudguard with tapered inner profile to prevent alloy wheel damage

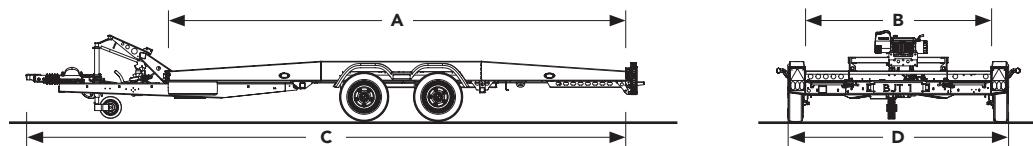

Four wheel brakes with automatic reverse operation

High Visibility bodywork enhances the professional nature of Hi-max

180-1000 with optional centre deck and manual fully adjustable winch ▲

TECHNICAL INFORMATION.

LOAD BED LENGTH m A	5.00	
CAPACITY		
Gross kg	3,500	3,500
Load kg	2,780	2,760
Unladen trailer weight kg	720	740
DIMENSIONS		
Load bed width m B	1.95	1.95
Overall trailer length m C	6.53	6.53
Overall trailer width m D	2.31	2.31
Towball height (loaded, centre of towball) m	0.40	0.40
HYDRAULICS		
Hydraulic tilt-bed operation	—	•
PRODUCTS		
Product code	180-1000	180-2000

Centre Deck, full floor option provides a clear and useful space for a multitude of load types. Also acts to keep vehicles protected from road debris. Includes an enclosed storage tray in the front section

Protected lighting includes additional marker lamps and modern 13-pin plugs (7-pin adaptor supplied). Fully approved to EEC lighting directives

Rear Stands on the non-tilt operation Hi-max provides support for loading. The 'kick down' operation is simple, quick and reliable

Low and Light chassis, with 'soft ride' suspension = stable, comfortable performance

Low sides allows vehicle doors to open. Easy step out for drivers

HOT DIP Zinc Galvanised chassis parts. This process ensures maximum protection

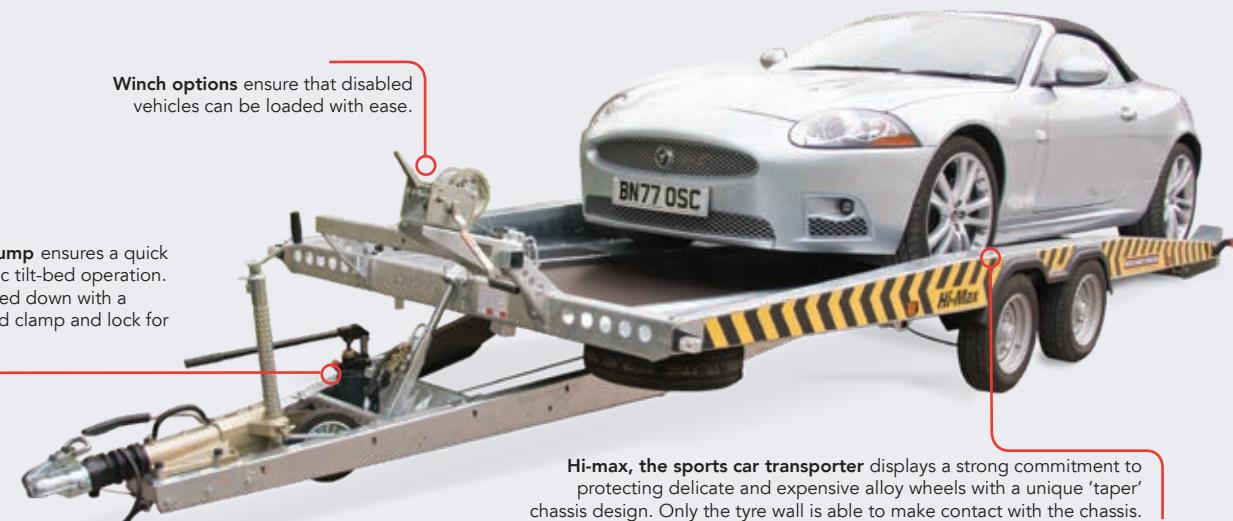

5 year Chassis Warranty covers chassis against failure through normal wear and tear

5 YEAR CHASSIS WARRANTY

Taper profile chassis designed to prevent damage to alloy wheels

Pull-Out Ramps deploy in seconds and are held securely by locking pins. The ramp surface is lined in hi-grip material for safety during loading. The combination of ramps and hydraulic tilt-bed provides low loading ability, suitable for sports cars

Winch options ensure that disabled vehicles can be loaded with ease.

Hi-max, the sports car transporter displays a strong commitment to protecting delicate and expensive alloy wheels with a unique 'taper' chassis design. Only the tyre wall is able to make contact with the chassis.

180-2000 with optional centre deck and manual fully adjustable winch

Wheel chock and tie-down strap options provides a flexible method of ensuring that the vehicle is always in the correct place.

Hi-max trailers in more detail

Standard Features

Highly visible body markings

Bright and obvious the Hi-max looks every inch the part.

Robustly protected lighting

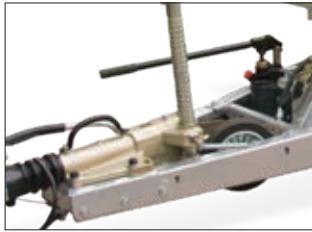

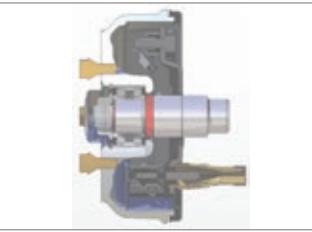

To insulate the lighting system from bangs and scrapes each lamp is fully protected.

Easy fit number plate

The number plate mounting system uses no screws or adhesives, just good design.

Damage Protection

is an integral part of the chassis guiding wheels away from contact and damage.

Softride suspension

is a key component of on-road performance. Impressive smooth riding, high capacity chassis.

Robust running gear

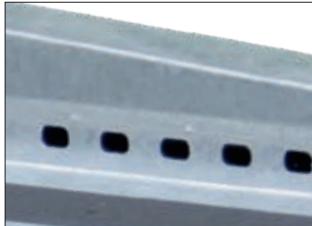

Proven large format wheel bearings by NTN are specified to ensure total reliability.

Robust running gear

Heavy cast steel coupling head and main control body are designed for years of service.

High security lock system

integral in the cast coupling head, provided with a security ball to prevent coupling when remote.

Powerful Hydraulics used to lift the tilt-bed version into position for loading. This facility provides a loading angle suitable for low sports cars.

Easy slide ramps deploy in only a few seconds, are captive so can't be fully withdrawn. The ramp system facilitates the low loading ability.

Integral tie-down points exist on both sides of the chassis, front and rear ensuring that you will always be able to secure the load.

Anti-slip pads Applied to all key areas of the trailer where additional grip is an advantage.

Integral mudguards

Suppress excess spray and complete the integrated design.

Spare wheel / tyre mounted conveniently under the bed until required.
